

02102K HF Unloaded Antenna Kit

With Spring & Base

The model 02102 antenna is a rugged tapered Stainless Steel antenna built for use on both automatic and manual tuning units (& is $\frac{1}{4}$ wave on 27MHz). Its Heavy Duty Stainless Steel rod and robust fittings are designed to withstand rough environments.

The 02102 antenna radiating section is a Spring Hard, Ground & Polished 17/7PH tapered Stainless Steel rod.

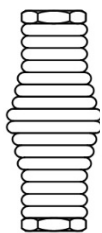

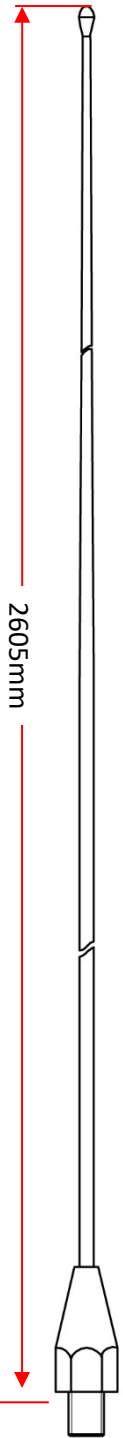

Whip top and bottom fittings are constructed of Brass, finished in a Nickel Plating. The radiator is securely screwed into the base ferrule.

The 02102K antenna kit comes with:

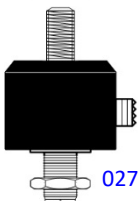

- 02102 Antenna Whip
- 02750B Spring
- 02733 Mobile Base

Packaging:

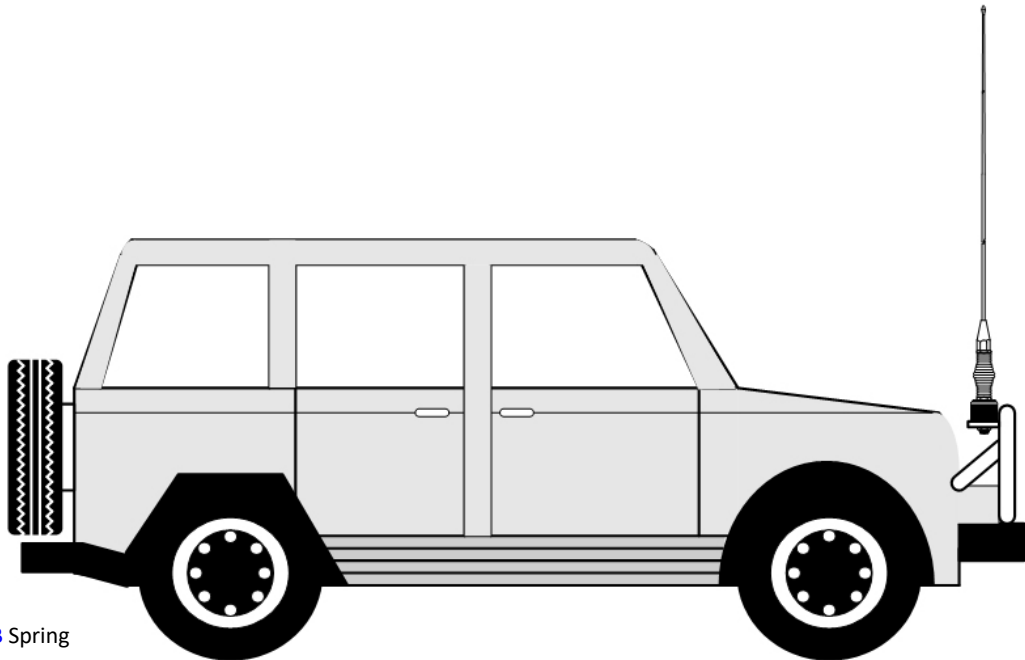

1 tube, 2800x45x45mm, G.W. 2kg + 1 box, 240x230x240mm, G.W. 2 kg

02750B Spring

02733 Mobile Base
