Benelec HF ¼ Wave Tapered Stainless Steel Whip 2.6m

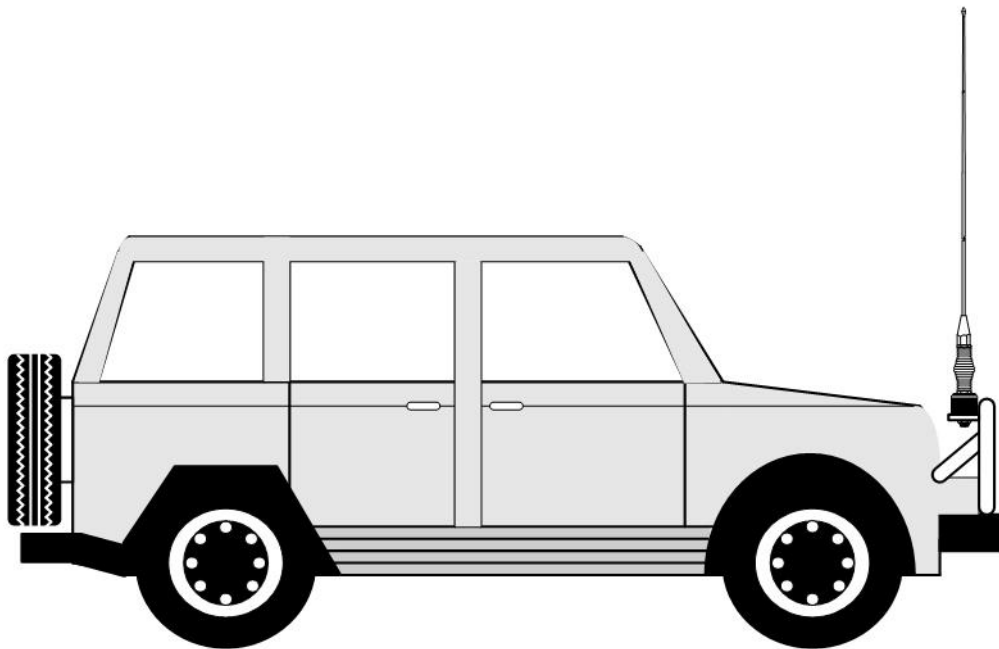

The model 02102 antenna is a rugged tapered Stainless-Steel antenna built for use on both automatic and manual tuning units (& is ¼ wave on 27MHz). Its Heavy-Duty Stainless-Steel rod and robust fittings are designed to withstand rough environments.

The 02102 Antenna radiating section is a Spring Hard, Ground & Polished 17/7PH tapered Stainless Steel rod.

Whip top and bottom fittings are constructed of Brass, finished in a Nickel Plating. The radiator is securely screwed into the base ferrule.

The antenna can be used on Spring Model 02750B in combination with Mobile Base Model 02733 (these items are sold separately, or complete kit 02102K).
