## “On-Glass” Unity Gain Window Mount Antenna

This patented “on-Glass” antenna technology permits RF transmission and reception through glass. It utilizes mounting that permits installation without holes, providing a complete seal against moisture and long lasting holding power.

### Applications

Vehicular Communication

### Tuning

No tuning required – factory tuned

### Features

- ✓ Unique - technology transmits and receives through glass
- ✓ In-built tuner which allows for wide band frequency coverage
- ✓ Efficient - mounting method allows no-hole installation in minutes, with long-lasting holding power
- ✓ Weather Proof - water cannot enter vehicle through gasket failure or cable channels
- ✓ Effective - mounts high in the vehicle for optimal omnidirectional coverage
- ✓ Convenient - whip is easily adjustable to vertical position
- ✓ Disguise cellular look-alike models available for covert public safety applications

### Specifications

Gain:	Unity
VSWR:	<1.5:1
Impedance:	50 Ohm Nominal
Power Rating:	50 watts
Polarisation:	Vertical
Radiation Pattern:	DOmni-directional
Cable:	RG-58 cable tail (15 ft)
Termination:	Unterminated & Loose mini- UHFp
Coupling Unit:	DC grounded, Shunt-fed
Radiator Materials:	Stainless Steel Stainless steel, black finish with stainless steel whip encapsulated
Mounting Footprint:	1.75" sq
Mounting Method:	Mount with black finish and stainless steel hardware and plastic ABS cover
Net Weight:	230 g

### Packaging

Polybag, 1 Antenna per bag, 200 mm x 280 mm, **GW** 280 g

### Warranty

3 years (Please refer to [Benelec Terms & Conditions](#))
