

Benelec Magnetic Radio Microphone Holder

The 07202 magnetic microphone holder provides a secure and practical storage solution for handheld microphones in both mobile and fixed radio installations. Designed for broad compatibility, it works with virtually all handheld radio microphones and features a powerful magnetic retention system that allows the microphone to snap securely into place with minimal effort. Once attached, the microphone remains firmly held, even in environments subject to vehicle movement or vibration.

Its convenient one-handed attachment and release operation improves both efficiency and user safety, making communication equipment easier to access when needed. With a versatile and durable design, the 07202 is well suited for use in emergency service vehicles, commercial fleets, control rooms, and base station environments.

FEATURES

- Compact design
- Robust construction
- Strong Magnet retention
- Compatible with any handheld microphone with a round metal bollard
- Integrated grounding
- Mounting Hardware included

CONTENTS INCLUDE
