

DATASHEET

Phasing Harness 4 Way

88-108 MHz VHF FM Band N plug

The 10324W phasing harness is a four-way cable power divider intended for the coupling of four Hi Band VHF side mount dipoles. It comes with a female input connector and four female output connectors. It offers a wide bandwidth, matching that of the four-stack array.

APPLICATIONS

Phasing of four stack dipole arrays for the band 88 -108MHz.

FEATURES

- Wide bandwidth
- Medium Power
- Quality connectors
- Plated brass components

TUNING

Factory tuned - No further tuning required.

MOUNTINGS

Customer determined.

PACKAGING

Poly Bag PVC

WARRANTY

12 months (Please refer to [Benelec Terms & Conditions](#))

SPECIFICATIONS

VSWR	<1.2:1 @ 88-108MHz
Impedance	50 Ohms nominal
Power Rating	200 Watts
Cable	RG11
Termination	N female input/N female outputs
Base Material	Chromed Brass
Length	1127mm output to output
