Intelli Smart Batteries

**Benelec Intelli
Smart Li-Ion
2300mAh battery**
06104521B

The 06104521B is an Intelli Li-Ion 2300mAh battery with smart charging capability to work with Intelli battery chargers. This battery can communicate with the charger in order to provide valuable details and information for the user via the two line LCD on the charger. It displays broad battery charging data as well as the battery's specification details. The battery details are stored within the circuitry of the battery.

- Rated Voltage: 11.1v
- Discharge: 8.25v
- Resistance: $\leq 200 \text{ m}\Omega$ (AC 1KHz)

**IMPRES™ is a trademark of Motorola Solutions*

Specifications

- Increase capacity at 2300mAh
- Japanese Li-Ion cells
- Protection:
 - Overcharge
 - Over discharge
 - Short circuit
 - Over circuit
 - Over temperature
- IP67 rated to suit the BLP & KNG series portable radios
- Compatible with Motorola IMPRES™ technologies
- Can be charged by non-Intelli chargers

Intelli Integration into any Battery

The Intelli Smart chargers are a multi-chemistry charger capable of charging: NiCd, NiMH, Li-ion and Li-Po chemistries. Upon request, the Intelli Smart technology can be integrated into any battery brand and model to allow any battery to be able to communicate with the Intelli charger series. The battery will include the modifications required to facilitate smart charging capability and battery details to work with Intelli Battery Chargers.
